Personal Profile

Motivated Computer Science graduate with a solid foundation in software development and cross-platform application design. Proficient in C#, Python, and modern development frameworks including .NET MAUI and scikit-learn. Experienced in building responsive applications and implementing data-driven solutions through academic projects. Strong understanding of software engineering principles, version control, and collaborative development practices. Eager to contribute to a graduate software development role while continuing to expand technical expertise in a professional environment.

Education

BSc (Hons) Computer Science (2:2)
Manchester Metropolitan University, Manchester, UK
September 2021 – May 2024

Relevant modules: Software Engineering, Web Development, Database Systems, Computer Networks, Artificial Intelligence

---

Technical Skills

Programming Languages:
C#, Python, Java, C++

Frameworks & Libraries:
.NET MAUI, Node.js, scikit-learn

Tools & Technologies:
Visual Studio, Visual Studio Code, Git,

Technical Areas:
Software Development, Web Development, Database Management, Networking

---

Projects

Music Recommendation System (Python, scikit-learn)
2024

- Developed a machine learning-based recommendation system using Python and scikit-learn, trained on a dataset of over 10,000 songs.
- Implemented data preprocessing, feature extraction, and model training to generate accurate song recommendations.
- Evaluated model performance and achieved strong predictive accuracy during peer testing.
- Demonstrated understanding of machine learning workflows and data-driven problem solving.

Cross-Platform Mobile Application (C#, .NET MAUI)
2024

- Designed and developed a cross-platform mobile application using C# and .NET MAUI, featuring a multi-page architecture and responsive UI.
- Applied software engineering principles including modular design and separation of concerns to ensure maintainability.
- Implemented navigation, user interaction handling, and data processing functionality to enhance user experience.
- Identified and resolved bugs and performance issues through testing and debugging.
- Used Git for version control and project management.
